

East tower concrete is complete and exterior framing in progress. Elevator shaft walls almost complete.

Mobile cranes on site. Formwork for columns main to second floor and second floor slab being installed.

Community Update:

Bridgeland Riverside Continuing Care Centre

Overview

- The \$130.5 million Bridgeland Riverside Continuing Care Centre (BRCCC) is a stand-alone facility being constructed in the Bridgeland community on the northwest corner of the site previously occupied by the now demolished Cross Bow Continuing Care Centre.
- The Bridgeland Riverside Continuing Care Centre will help address a shortage of spaces for Calgarians requiring continuing and complex care. The new centre will also free up hospital beds for patients requiring active treatment.
- The new Bridgeland Riverside Continuing Care Centre will create a space for almost 200 individuals.
- The facility is designed to support the residents through patient and family centered care concepts that include the incorporation of natural light, pathways and gardens.
- The Bridgeland Riverside Continuing Care facility will be run in partnership with Carewest, a wholly-owned subsidiary of AHS, who has a long history of providing care to seniors and adults with complex care needs.
- In addition to residential care, the facility will also provide outpatient and day program services for seniors.

Construction update

- The artwork collected from local schools and the Bridgeland Riverside Continuing Care Centre project team has been installed on the construction fence.
- Two mobile cranes have been brought to site in addition to the existing tower crane.
- Building enclosure and framing of the West tower is almost complete; remainder of the building is in progress.
- Interior fit-out of West tower in progress.
