

Employee Health, Safety and Wellness

Statement of Commitment

At Carewest, we believe in the importance of the health, safety and psychological well-being of our most valuable assets, our employees.

Management is committed to creating a healthy work environment, supporting appropriate training, fostering a positive attitude towards physical health, psychological health, safety and wellness.

Each of us share the responsibility to be aware of and comply with Carewest health and safety policies, procedures and relevant government legislation and regulations.

Everyone, including volunteers and contractors has a responsibility for their own personal wellness, personal safety and the safety of their co-workers which contributes to a healthy, safe and respectful workplace.

Achieving a healthy and safe environment can only be achieved through the collaboration, co-operation and action of all.
